

## Source Code :: Javascript Merubah Angka Menjadi Rupiah ::

```
<html>
<head>
  <script language="javascript">
    function convertToRupiah(angka){
      var rupiah = '';
      var angkarev = angka.toString().split('').reverse().join('');
      for(var i = 0; i < angkarev.length; i++) if(i%3 == 0) rupiah +=
      angkarev.substr(i,3)+'.';
      return rupiah.split(',rupiah.length-1).reverse().join('');
    }

    function rupiah(){
      var nominal = document.getElementById("nominal").value;
      var rupiah = convertToRupiah(nominal);
      document.getElementById("nominal").value = rupiah;
    }
  </script>
</head>
<body>
  <form>
    Nominal Rupiah : Rp <input type="text" id="nominal" name="nominal"
    onBlur="rupiah()">
  </form>
</body>
</html>
```
